A governmental university created by a legislative decree number /25/ year 2002
The Syrian Virtual University (SVU) is an accredited state university established by Legislative Decree No. (25) in the year 2002. SVU aims to be one of the leading world universities in the region. SVU also aims at developing human resources consonant with international academic and professional criteria. SVU’s objective is to meet the market needs nationally and regionally. SVU is working to provide a modern learning, training and research system in the academic and vocational fields to enable the learner and the trainee to engage effectively and directly in the labor market by developing their skills and regional needs in science and technology. SVU seeks to enrich knowledge utilizing e-learning technologies and investing in academic and professional lifelong learning. SVU is committed to establish long-term relationships with its graduates. Quality assurance is a target.
Vision

The Sharjah University (SU) aims to be among the best universities in the region and internationally, characterized by excellence in teaching, research, and community engagement.

Objectives

1. Enhance the educational and research programs to meet the needs of the region and society.
2. Foster a culture of innovation and entrepreneurship.
3. Strengthen partnerships with governmental and non-governmental organizations.
4. Promote international cooperation and exchange programs.
5. Develop a strong and diverse student body.
6. Improve the infrastructure and facilities to support academic and administrative activities.
7. Enhance the financial and administrative management systems.
8. Foster a campus environment that is conducive to learning and creativity.

The SUUU needs to be among the best universities in the region and internationally by providing high-quality education and research programs, fostering innovation, and strengthening partnerships.
Bachelors & Institutes Programmes

- Technological Institute of Computer TIC
- Bachelor in Information System Engineering ITE
- Bachelor in Information Technology BAIT
- Bachelor in Communication Technology BACT
- Bachelor in Law Sciences BL
- Bachelor of Science in Economics BSCE
- Bachelor in Mass Communication BMC

برامج الإجازات والمعاهد

- المعهد التقني للحاسب
- الإجازة في الهندسة المعلوماتية
- BAIT
- الإجازة في تقنية الاتصالات
- BACT
- الإجازة في الحقوق
- BL
- الإجازة في الاتصال
- BSCE
- الإجازة في الإعلام والاتصال
- BMC
Master & Diploma

- Educational Habilitation Diploma (EDUC)
- Master in Business Administration (MBA)
- Master in Web Technology (MWT)
- Master in Web Sciences (MWS)
- Master in Quality (MIQ)
- Master in Technology Management (PMTM)
- Master in Integration of Technology in Education (MITE)
- Master in International Humanitarian Law (MIHL)
- Master in Medical Education (MEDE)

Virtual, Open and Social Learning Environment
Commitment Initiative

The Virtual University is committed to its academic and social mission, as it endeavors to provide the educational attainment for a broad spectrum of the Syrian youth while maintaining its economic and developmental role and its self-financing as a public institution capable of financing and developing its work.

The University offers a 30% grant for any training course for its graduates within ten years of their graduation.

The Board of Trustees of the Syrian Virtual University approved the system of (scholarships and reduction in tuition fees) of the Syrian Virtual University according to the following terms:

Military  Superior  Martyrs' families  War Wounded  Employees  Graduates  Competitions

www.svonline.org
Student Support

This system is used to collect the intellectual output of the university in an encyclopedia of open and diverse educational resources, free and available for those who are interested in learning. This is done by presenting those resources in forms of:

1. Academic description of the virtual university courses in Arabic and English.
2. Official books of the academic programs courses published under the Creative Commons license.
3. Brilliant thesis and scientific researches presented in the academic master programs of the university.
4. Research papers of students, tutors and staff published in international journals and related to the fields of virtual learning.
5. Training courses held by the university in various fields.
6. Ideal lectures given by university teachers in various university programs.

To maintain the uniqueness of SVUPedia and to give it a standard and civilized character and in order to keep up with international standards in the field of publishing and scientific research, the university has got an identifier serial number from the International Standard Serial Number (ISSN), which is the most comprehensive international reference database for global numbering in a serial and standard manner. Technically, this encyclopedia was built and developed using the Moodle platform, the world’s leading open source and learning management systems.
Academic, Vocational and Administrative Support Program

In recognition of the university's administration for the importance of the success of its students in achieving the best results, and in order to follow up their individual and collective achievements as part of the process of evaluating the quality of their outputs and following up on their improvement, it believes that educating and guiding the student during their studies at the university, within the program of academic and administrative supervision, is one of the pillars of achieving professional and academic excellence in the university.

This is done by focusing the study and management environment on the university, especially the laws and regulations in force, and the way in which the study is organized.

The academic and administrative supervision program consists of two parts: administrative guidance and academic supervision and it’s a free program.

Chat Bot: JULIA

Julia was built to be the intelligent modern form of giving help and support in the educational process of the SVU, it’s a superior experiment for introducing the AI. technologies in the educational environment. It’s a simulator (BOT) that automatically answers students’ questions using text recognition techniques and identifies the most appropriate answers. It creates discussions and skills depending on the goal of its programming, these skills have certain characteristics and behavior capable of learning, make conclusions and responding in new manners that has not been pre-programmed.

This simulator helps students get responses to their diverse questions during their educational life by sending a text message to Facebook Messenger.

The Syrian Virtual University’s Telecenters are the centers accredited by the University to provide places for its students to do their exams. Our centers are located in most Syrian governorates and in many Arab and foreign countries. We always strive to increase their outreach in order to be closer to our students.

The role of telecenters: Telecenters provide students with the opportunity to submit their examinations from any place they are in without having to go to a single, central examination center. The centers are characterized by strict monitoring mechanisms which guarantee the credibility of the university examinations. This includes two types of joint monitoring:

- Local monitoring: conducted by accredited local observers and technical remote monitoring by computer software to control the computers from which exams are taken in addition to surveillance cameras covering each center. These cameras are followed up by accredited observers on the site of the central exam control within the University Center in Damascus to follow up on the situation of online tests and recording them minute by minute at all telecenters.

Moreover, the centers located in the Syrian governorates enable the student to receive the identification papers he has requested through the electronic application system from the nearest center.

**Internal telecenters:**
- Damascus
- Damascus countryside
- Sweida
- Homs
- Hama
- Tartous
- Lattakia
- Aleppo
